

# VIPER™

## Milk Jug Rinsers & Stand

Viper is the latest in innovative coffee making apparatus, designed to optimise and revolutionise your café needs

[www.vipersteamer.com](http://www.vipersteamer.com)

## Milk Jug Rinser

---

A Viper Milk Jug Rinser allows baristas to efficiently cleanse milk steaming jugs during service. Rinsing steaming jugs between each use is a sanitary preparation practice and ensures a consistent quality of frothed milk.

The Viper Milk Jug Rinser is available in an above bench or in bench design. Manufactured in both a Left or Right hand operation, Viper Milk Jug Rinsers adds simplicity too all coffee making work spaces.

AND LAYOUTS**

---

## Milk Jug Stand

---

A Viper milk jug stand is an adjustable working platform that allows for the milk jug to be raised 120mm off your cafe bench.

Compatible with most coffee machines, this little platform allows busy barista's a hands free approach to milk frothing.
